MY COMBINE PRIVACY POLICY

Effective Date: October 20, 2026

My Combine LLC ("My Combine," "we," "our," or "us") respects your privacy and is committed to protecting your personal information.

This Privacy Policy explains how we collect, use, store, share, and protect information when you use the My Combine mobile application and website (the "Services").

By using the Services, you agree to the collection and use of information as described in this Privacy Policy.

1. Information We Collect

The information we handle depends on whether you use the mobile app, join the website waitlist, or contact us.

App Account and Profile Information

When you create or use an app account, we collect or store:

- Your name, email address, and an account identifier used to associate your data with your account
- Your date of birth, or age where used as a fallback, and your selected gender for Runner Score benchmarking
- Your training level, primary goal, and optional body weight
- Your settings and preferences, such as units, training surface, equipment, and notifications

Firebase Authentication handles email and password sign-in. My Combine does not receive or store your password in plain text.

Website Waitlist Information

When you voluntarily join the website waitlist, we collect:

- Email address
- Optional first name
- The date and time of signup, recorded by the waitlist service
- Signup source, including whether you expressed interest in a possible Founder offer
- Marketing attribution information you arrive with, such as a UTM source parameter

The website also records your separate choice about requesting email updates. A waitlist signup is not, by itself, consent to receive marketing updates; a request for updates may remain pending until address ownership is verified. Expressing Founder interest does not confer eligibility or reserve a place.

Performance and Workout Data

When you train or test in the app, we may store:

- Workout sessions, training plans, drill attempts, repetitions, results, and history
- Timing and measurement results, timing method, training surface, and relevant equipment selections
- Official Test Day results, personal records, Runner Score and component scores, and progress history
- Optional timing-remote connection information and timing results when you use that feature

Subscription and Billing Information

If you subscribe through the iPhone app, we receive or store information needed to check access, including subscription status, product or entitlement information, and purchase-related records. Apple processes App

Store payments, and RevenueCat helps manage subscription entitlements. My Combine does not receive your full payment card number.

App, Website, and Diagnostic Information

The app and website may process technical information needed to operate and protect the Services, such as app version, device or operating-system information, browser and connection information, account identifiers, and error information. The app records limited product events for functionality and troubleshooting. When app monitoring is configured, Sentry may receive sanitized crash, performance, and diagnostic events and related usage breadcrumbs. The app may keep local copies of account or workout data to support recovery and syncing.

2. How We Use Information

We may use collected information to:

- Provide and operate the Services
- Create and manage user accounts
- Generate workout recommendations using profile, training, and recent workout information
- Track athletic performance
- Calculate Runner Scores and related metrics
- Check subscription access and process App Store purchase status
- Troubleshoot errors, support syncing, and improve app functionality
- Respond to customer support requests
- Maintain and administer the My Combine waitlist
- Provide launch, early-access, and availability information in accordance with your communication choices
- Communicate information about Founder or early-user opportunities if offered, without treating waitlist interest as approval
- Understand which marketing sources are generating interest in My Combine
- Maintain platform security
- Detect fraud and abuse
- Comply with legal obligations

3. How We Share Information

My Combine does not sell, rent, or trade personal information to advertisers, data brokers, or unrelated third parties.

We may share information in limited circumstances, including:

Service Providers

We use service providers for specific parts of the Services:

- Google Firebase for app authentication, cloud storage, and server functions
- Apple and RevenueCat for App Store subscriptions and access status
- Google Sheets and Google Apps Script to process and store website waitlist signups and related records
- Sentry for app crash and diagnostic monitoring when monitoring is configured
- OpenAI for workout-planning requests when the app uses AI-generated workout recommendations; these requests include training and workout-planning inputs, not your account email or date of birth
- Website hosting and delivery providers needed to serve the site

The information processed by each provider depends on the feature you use and the provider's role. Their handling of information is also governed by their applicable terms and privacy practices.

Legal Compliance

We may disclose information if required to:

- Comply with applicable laws
- Respond to legal requests
- Protect user safety
- Enforce our Terms of Service
- Protect the rights of My Combine

Business Transactions

If My Combine is involved in a merger, acquisition, financing, asset sale, restructuring, or similar transaction, user information may be transferred as part of that transaction.

4. Your Sharing Choices

Your app profile and workout history are not published as a public social profile by default. If you choose to save or share an Athlete Card image, information visible in that image may be available to the people or services with whom you share it. You control that action through your device's sharing options.

5. Data Retention

We generally retain app account and workout information while your account remains active. We retain website waitlist information while administering the waitlist and related communications, unless you request its removal or it is no longer needed. Retention may vary by data type and provider; we do not state a single fixed period for all records.

After an account deletion request is completed, some information may be retained where needed for legal obligations, billing or accounting, security, fraud prevention, or disputes. Limited copies may remain temporarily in logs, backups, archives, and service-provider systems under their normal retention processes. We review deletion and removal requests using the contact method below.

6. Account and Waitlist Deletion

App users can start account deletion in the app through Settings > Account & Support > Delete Account. The flow may ask you to confirm with your current password and requires a connection to complete the server-side steps. If the flow is unavailable or does not complete, contact team@mycombineapp.com for assistance; an unsuccessful attempt does not mean your account was deleted.

Deleting a My Combine account does not cancel an active App Store subscription. You must manage or cancel that subscription separately in your Apple ID subscription settings.

To request removal of a website waitlist entry or ask about personal information, email team@mycombineapp.com. The website waitlist and the mobile app account are separate; removing one does not automatically remove the other.

7. Data Security

My Combine uses reasonable administrative, technical, and organizational safeguards designed to protect user information.

However, no method of electronic storage, transmission, or internet-based communication can be guaranteed to be completely secure.

Users acknowledge that information is transmitted and stored at their own risk.

8. Children's Privacy

The Services are intended for users who are at least thirteen (13) years old.

My Combine does not knowingly collect personal information from children under the age of 13.

If we become aware that information has been collected from a child under 13 without appropriate consent, we may delete the information and terminate the associated account.

9. Your Privacy Rights

Depending on your location and applicable law, you may have rights relating to:

- Accessing your information
- Correcting inaccurate information
- Requesting deletion of information
- Restricting certain processing activities
- Receiving information regarding data practices

Requests may be submitted by contacting My Combine using the contact information below.

10. Changes to this Privacy Policy

My Combine may update this Privacy Policy from time to time.

When material changes are made, we will update the Effective Date and provide notice through the Services or by other appropriate means where required.

Continued use of the Services after changes become effective constitutes acceptance of the revised Privacy Policy.

11. Contact Information

If you have questions regarding this Privacy Policy or our privacy practices, please contact:
